Skills

Node

React

Express

SQL

NoSQL

Git / Github

Webpack

Bash

Linux

Unix

Experience

2022 - Current Software developer - Entrii

Currently I am dedicated to develop data visualization tools for the comparison of different product or article oriented markets.

2022 - 2022 (5 month) Software developer - B-kaind Dataway

I used to develop internal use tools based on Javascript environment: Node, React and Express. I also used NonSQL databases such as Firebase and Mongo.

Certifications

2022 - 2022 IronHack - Angular & Ionic bootcamp

I had the opportunity to attend this bootcamp while continuing my studies on microcomputer systems and networks. On this bootcamp I learnt Angular workflow using Rxjs for reactive programming and angular material for the styling. Then we apply all this Angular concepts to develop an Ionic app.

2021 - 2023 San Luis Center - microcomputer systems and networks

On this computer science bachelors I learnt the functioning of a computer and local networks. I've learnt how to set up services on linux machines, such as dhcp, dns, http and more. I've also worked with bash scripts, powershell scripts, prometheus and grafana for systems monitoring.

2018 - 2021 Cipsa center - Java technician programmer

In this course I have learned Java from scratch using real world examples and mastered object oriented programming. All this made me develop logical thinking.
